DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 and are rejected under 35 U.S.C. 103(a) as being unpatentable over Shin (US 6,526,080) in view of Hennick (US 6,370,003).

Shin discloses an illuminant cable comprising:

- a first compatible electric member and a second compatible electric member [figure 3], each member having a circuit board mounted inside a housing and a light emitting element, a cable [80] connected between the first and second members, and a fiber optic axially mounted within a tubular outer shell of the cable and connected between the light emitting element of the first and second members [column 3, lines 16-34].

Shin discloses the instant claimed invention as described above except for the members are USB connectors and the cable comprises power lines and metal grounding wires.

Hennick teaches a cable assembly comprises USB connectors and a cable comprises power lines and metal grounding wires [column 3, lines 15-20, and column 5, line 14].

Art Unit: 2839

It would have been obvious to one having ordinary skill in the art at the time invention was made to modify the connector of Shin to provide the USB connectors and cable as taught by Shin for the purpose of facilitating the connection between the USB connectors and mating USB connectors, and providing the power and grounding to the system.
